

- Nello Wall Systems designs, manufactures, and installs Architectural Walls, and has been providing environmentally friendly, flexible office solutions for over 35 years.
- Nello Architectural Walls set the standard for sustainability; the first Nello wall was designed by Frank Gehry in 1973, it has since been reconfigured and reused many different times, and is still in use today.
- Nello is a Veteran Owned Small Business located just north of the Washington, DC Capital Beltway.
- Nello has the experience, knowledge, and low-overhead, competitive-cost advantage to make your project a success.

- Nello's glass Architectural Walls strike the perfect balance between storefront-style visual impact and long term ease of mobility.
- Interior segmented fabric walls improve sound absorption while providing true tackable functionality.

Whether creating a public-facing customer service space, a staff conference room, or a suite of executive offices, Nello's glass Architectural Walls can be configured in a limitless array of colors, patterns, and textures to suit any need.

- Wood veneer panels can be used to accent or define a dramatic and powerful private space.
- Painted MDF, (available formaldehyde-free, with high-recycled content), is a durable solution for high traffic areas.
- Tackable-fabric, self-healing walls epitomize ergonomic efficiency for task-oriented desk spaces.
- In any finish format, Nello's Architectural Walls represent the best return on investment for a flexible, ever-evolving office environment.

- Nello Architectural Walls offer your design team multiple opportunities for LEED Credits.
- In fact, at the GSA Headquarters Swingspace, Nello Walls contributed to a LEED Platinum certification, (as shown).
- Beyond the LEED initiative, Nello Architectural Walls have repeatedly been chosen by forward-looking designers seeking the most sustainable solution for an easily reconfigurable office floor plan.
- Nello has consistently proven its ability to successfully complete large scale environmentally sensitive projects while exceeding budget and lead-time expectations.

Nello strives to continually improve, refine, and even reengineer its Architectural Walls so that it can deliver the best product to its customers.

If you have a unique design vision in mind, Nello is always intrigued by, and well positioned to excel at, Build to Spec Opportunities.
