

# CLARITY

We see your vision through.

**Go from mundane to iconic.**

Elegant, classic and timeless, Clarity glass office fronts beautifully complement any environment. More than just a frameless glass wall, Clarity seamlessly integrates with base building architecture and interior walls of any type, configuration or finish. Truly frameless in every aspect—including the door frame—no other glass wall system can compare to Clarity. Free from unsightly frame members, these stunning glass office fronts offer the splendor of uninterrupted glass. And with our boundless design options, it's easy to create statement-making workspaces that deliver chic, luxurious style.

**Clarity glass office fronts create inviting spaces filled with light, transparency and clean details.**

Featuring a minimal base track, a virtually endless span capability and our new Control Close door system, Clarity brings an air of sophistication to any environment. Unparalleled beauty combined with a practicality make Clarity glass office fronts the obvious choice for incomparable design freedom.

- Frameless design offers stunning detail and classic beauty
- Endless design options allow for custom solutions to suit client needs and preferences
- Simplified glazing with flexible, ultra-clear gaskets. No messy silicone needed
- Innovative engineering, high quality components, environmentally-friendly elements and unparalleled durability

### Clarity Control Close

Clarity's glass walls with sliding doors create sleek, elegant fronts with uninterrupted sightlines. They offer the perfect solution wherever space is limited. Our state-of-the-art overlapping sliding door system dramatically reduces sound transmission, while our innovative Control Close mechanism guards against banging. Clarity's unique guide stop assists with easy closing and eliminates annoying wobbles.

### Sliding Door Control-Close

Slows door speed as it opens and closes, preventing glass door slam damage.

### Adjustable Anti-Jump Cars

Allows door height adjustment to compensate for uneven floors. Sliding cars lock into top track to prevent glass doors from jumping off track.

### Floor-Mounted Door Guide/Stop

Guide/Stop provides a positive close to allow for precise locking handle alignment and damage from attempting to push the door open.

### Overlapping Sliding Door

Reduces sound transmission and eliminates the need for unsightly seals.

### Minimal Two-Piece Base

New low-profile design maximizes height adjustment and allows easy shim access.

### Tape Joints & Hook Lock Gaskets

Dry gaskets lock into tracks with opposing "fish hooks" on tracks and gaskets. This eliminates the possibility of gaskets dislodging.

## Pivot Doors

Offering premium functionality and self-closing mechanisms for added safety, frameless glass pivot doors by Nello are a beautiful way to create a clean, open appearance for any space. Completely frameless, there's nothing to see but chic, upscale style. Now you can also mix our trendy glass walls with warm wood doors, creating an interesting look for both modern and traditional décors.

### Non-Locking Ladder Pull Handle

Our handsome brushed steel pull handle is available in a wide range of colors, styles and sizes ranging from 24" to 72".

### 60" Locking Ladder Pull Handle

Our lockable pull handles are available in floor and ceiling models. Interchangeable lock cores can be specific to fit any building key system.

### ADA-Compliant Handle

Our accessible hardware includes ADA-compliant locking handles with 10" floor clearance for pivot doors.

### Pivot Door Locking Lever Handle

Frameless pivot doors offer a secure traditional lever lock by mounting lever and strike components in the door and adjacent glass panel.

### Custom Pull Handle

Let us bring your design to life. Our custom handles are available in leather, rectangular shapes, oversized pulls and many others.

### Pilaster

Our high-quality aluminum pilaster offers easy mounting of electronic device readers.

CB Richard Ellis - Baltimore, MD

## CB Richard Ellis

CB Richard Ellis (CBRE) is the world's premier real estate services company. When CBRE's Baltimore location needed renovations, the project architects, Gensler, wanted a contemporary and elegant frameless glass system to complement the upscale new office space they envisioned. The design team found Nello's Clarity glass office fronts to be the ideal solution. Nello provided numerous offices and conference rooms for CB Richard Ellis' Baltimore location.

## MetLife

MetLife, Inc.'s world headquarters, the MetLife Building, is a 59-story skyscraper located at 200 Park Avenue in midtown Manhattan, New York City. Nello's Clarity frameless glass wall system was selected to meet the architect's rigorous renovation requirements. The minimalist system allowed for the creation of a sophisticated yet flexible environment that could readily adapt to a changing organization.

MetLife Headquarters - New York, NY; Cary, NC; Hanover, NJ

MAKE Offices - Metro DC; Chicago, IL; Philadelphia, PA.

## MAKE Offices

MAKE Offices is a leader in the turnkey co-working space sector, offering a vibrant community setting balanced with just the right amount of privacy. Boasting a sleek, modern vibe, MAKE Offices sought a sophisticated yet contemporary solution for their glass office fronts and conference areas. They found Clarity by Nello to provide the perfect blend of beauty, durability and minimalist good looks.

## Sunoco

Sunoco is renowned for its diversified portfolio of energy assets. When the company's headquarters were relocated to the Philadelphia suburbs, the project architects were in search of design components that were both functional and attractive. Clarity glass office fronts were incorporated throughout the new design. Over 3,000 linear feet of interior glass walls provide a sleek, upscale ambience and abundant natural light.
