

NELLO

WALL SYSTEMS

Tower Federal Credit Union at Arundel Mills - Hanover, Maryland

PROJECT PROFILE

This new Tower Federal Credit Union office is located at Arundel Mills in Hanover, Maryland. The two-story flagship building houses a Branch on the first floor and Tower Financial Services offices on the second floor. Nello Wall Systems' newest movable wall product, Architectural Walls, was utilized in the building's highly visible first floor offices.

CHALLENGE

The building's initial design included permanent walls, but the need for a more flexible and attractive solution led to the change to movable walls late in the design phase. The building contained many small offices, yet needed to look modern and polished, as well as open and airy. Due to the late change in design, the project had an extremely short lead time and demanded quick delivery to meet the branch's occupancy needs.

SOLUTION

Nello Wall Systems was selected to build the front walls of the offices on the first floor, a high traffic, public area. Nello incorporated glass fronts that make the space appear more open and allow light to flow into the offices. Silver frames create a modern, polished look that complements the rest of the building's design. Full glass sliding barn doors were utilized to maximize available space. The end result is a sleek appearance that also offers flexibility and value.

"Nello was able to manufacture, deliver and install a beautiful, cost-effective product with very little lead time. Their walls make the branch look very sharp and polished. It was just what we were looking for. The entire experience was a pleasure and we are delighted with the result."
