

NELLO

WALL SYSTEMS

Corporate Headquarters—Rosslyn, Virginia

PROJECT PROFILE

This corporation is an Arlington, Virginia-based Fortune 200 global power company. Their diverse and growing portfolio of electricity generation and distribution businesses provide reliable, affordable energy to customers in 20 countries on five continents. When the firm's outdated headquarters recently needed renovations, the project architects, OPX, sought a stunning, contemporary frameless glass system to complete the sophisticated new office space they envisioned.

CHALLENGE

Faced with tight deadlines, budget constraints and upscale design requirements, the proposed new office design would be no easy task to complete successfully. Flexibility and ease of installation was also required in order to accommodate the needs of employees who occupied the space.

SOLUTION

The design team found Nello's Clarity frameless glass wall system to be the ideal solution. The system enabled the creation of an elegant yet flexible environment that could adapt to a changing organization with little disruption, dust, downtime, and dollars. Completely frameless, Clarity is as sleek and beautiful as it is practical and cost effective. Nello provided three floors of Clarity glass walls for the corporate headquarters, a total of 145 offices, while adhering to the client's fast-track schedule.
